DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22, 23, 30-31, 36-38, 42-43, 46-48 and 52, drawn to an anti-idiotypic antibody to an antibody that binds an MN protein, classified in class 530, subclass 387.2.
 - II. Claims 24-27, 32-35, 39-41, 44-45 and 49-51, drawn to an anti-anti-idiotypic antibody to the anti-idiotypic antibody of claim 30, classified in class 530, subclass 387.1
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II represent separate and distinct products. The anti-idiotypic antibody of Group I and the anti-anti-idiotypic antibody of Group II are structurally and chemically different from each other. The anti-idiotypic antibody of Group I and the anti-anti-idiotypic antibody are patentably distinct because the anti-idiotypic antibody binds the MN antibody and the anti-anti-idiotypic antibody does not. The examination of both groups would require different searches in the U.S. Patent shoes and the scientific literature and would require the consideration of different patentability issues. Thus, the inventions I and II are patentably distinct.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject

Art Unit: 1642

matter and different classifications, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
